

# More Output Than Anything in Its Class

## Evolution Series Subwoofer

The Episode Evolution Series represents a premier approach to subwoofer design. Engineering expertise meets pure power in a sealed design that produces highly accurate sound, deep bass, and premium performance. Encased in a beautiful high-gloss cabinet, these compact subwoofers can be hidden away in tight spaces or proudly displayed.

### Built for Performance

Equipped with top-shelf components and Episode's exclusive dual equalization circuitry, this subwoofer produces tight, punchy sound and deep bass – making it more musical and powerful than anything in its class.

### Sealed & Sophisticated

A sealed design produces highly accurate sound from a compact form factor, while a glossy cabinet and flush-mounted grille provides a premium look and feel.

### Customized for Performance

Either use the dedicated on/off switch or leave it in standby mode – the sub will turn off after 15 minutes of inactivity and roar to life as soon as a signal is detected.

## Evolution Series Subwoofer | Up to 720W
